PROGRAMMED CRIME PROFILES

Reprogramming of UCR-generated data was initiated in 1975 to provide maximum utilization of computer efficiency. In January of 1976 the new programs became operational. Chief benefactors of the new format are the contributors who make this comprehensive program possible by their outstanding support and cooperation.

On the following pages are sample printouts of generated data which are available monthly to every contributor. Quarterly printouts are mailed routinely to every reporting agency. The state total data has been selected as the sample for explanation in this publication. This sample is applicable monthly to every community submitting data through direct reporting to the UCR Division, the state police by the county and troop, the sheriff's departments, the county totals, state totals, and urban and rural breakdowns.

PRINTOUT 1

Printout number 1 consists of offense data submitted monthly on Part I, or index, crimes.

Specific monthly data is identified and recorded in columns to the left of the first vertical line. In between the lines are the cumulative figures on each index crime to date, and the projected crime rate per 1,000 population. The final column reflects the cumulative crime-to-date comparison from the preceding year, and the percent change in all crime classifications, based on the comparison figures.

Totals for all reported offenses appear at the bottom of the printout, with distinctions being made between the total index crimes and total crimes reported (includes manslaughter by negligence, and non-aggravated assault). Law enforcement officers assault data for the reporting month and the accumulated total is included. The sample printout is for the month of December; however, any particular selected monthly printout will provide similar data, both for the monthly data and the year-to-date data, as well as last-year-to-date comparison data.

PRINTOUT 2

Printout number 2 consists of data on property stolen and recovered by property type and value. The printout includes data for the reporting month, year to date, and last year to date comparison figures. Recovery percentages are computed for each property type on all monthly and cumulative entries. Totals of each column, and a total with motor vehicle values removed, are included.

PRINTOUT 3

Printout number 3 is a breakdown of offense data reported on form number 1. It primarily identifies locations of crime occurrence in crimes of robbery and burglary, and expands data on larceny by the analysis of larceny types and location. This printout systematically records the values of property stolen during commission of the various types and methods of the criminal act. This particular printout records the monthly data, year-to-date data, and year-to-date totals from the previous year. The final column indicates percentage of change from the previous year in both the number of offenses and the value of stolen property by crime.

PRINTOUT 4

Printout number 4 relates to the clearance of particular offenses by the reporting agency. The form is divided into three individual areas: current month, year to date, and last year to date for comparison purposes. It reflects the number of actual offenses, number of offenses cleared, percentage of offenses cleared, and the number of clearances involving only persons under 18 years of age.

PRINTOUT 5

Printout number 5 is intended to indicate to the police administrator on a month-to-month, year-to-year comparison any large variances in crime that require further analysis. The final column, showing change in a crime class, may signal needed change.
